

Recommended disposal procedure for Recalled Products:

Individual packages must be opened and thrown away under the supervision of a manager or designated person. A recommended procedure for disposal is stated below:

- Rubber gloves must be worn by employees completing this procedure (pregnant employees are not permitted to open packs).
- Select a designated internal waste receptacle(s) located in a remote area **away** from food preparation.
- Double bag the designated waste receptacle(s). Ensure trash bags are not overfilled to prevent any leakage or damage to trash bags.
- Open packs carefully to avoid contact with skin and eyes using scissors or packaging knife. Ensure the packaging is totally removed from the product.
- Dispose of the rubber gloves after use in the same trash bag as the opened packs.
- Securely tie the trash bags, and place in the secure trash removal location. Wash hands thoroughly after handling the trash bags.
- Clean and disinfect any utensils used to open packs i.e. scissors, packaging knives.
- Clean and disinfect the designated waste receptacle(s).
- Record in facility the Manager (designated Manager), and employee(s) who were responsible for completing this procedure.
